- Chinacable
- Epromsvet
- Habsans
- Metals Supply & Sales
- Uncomtech
- VLC Instrument
- Xinming

MARKET SITUATION REVIEWS

Nirmal Singh
Director at Assomac Machines Ltd

« In recent years, the situation is changing as India becomes interested in exploring the Russian market. Relations between the countries are strengthening, and the gradual import of Indian equipment to Russian enterprises is beginning, with contracts being signed. It is difficult to compete with China in production speed and scale, but we are confident that our equipment can meet demand with its quality and affordability »

« When discussing Turkish equipment, it's important to understand that the cable industry advances annually, the wire sector also develops, and equipment is exported globally, including to Russia. Therefore, our country is interested in providing a high-quality and durable product. Beyond equipment manufacturing, we offer comprehensive after-sales service »

Dicle Akcan
WIRE RUSSIA Representative in Turkey,
Projects Director Globalevents

THANK YOU!
